Description

Starburst Sauce Diamonds

The Starburst strain, known for its sweet, citrusy, and sometimes diesel-like flavor profile, can be found in a concentrate form called "Diamonds and Sauce". This type of concentrate combines two main components:

THC Content often exceeding 90%

- THCa Diamonds: Crystalline structures primarily composed of THCa, a non-psychoactive cannabinoid that converts to THC when heated, resulting in a potent high.
- Terpene Sauce: A flavorful, viscous liquid rich in terpenes, the aromatic compounds that give cannabis strains their unique smells and tastes.

"Diamonds and Sauce" is generally considered a highly potent concentrate, often exceeding 90% THC content once heated. It's recommended for experienced users or medical patients seeking strong effects.
